

Advanced Consequence Management

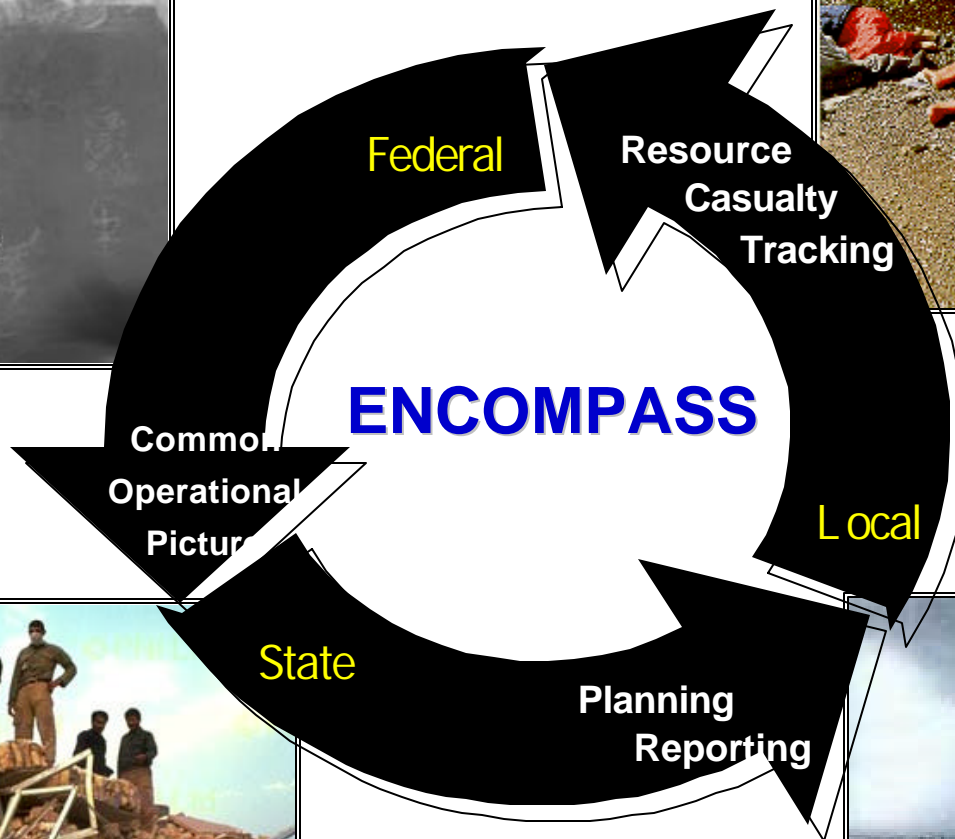

Enhanced Consequence Management
Planning And Support System
(ENCOMPASS)

Kurt Henry, M.D.

Program Manager

Defense Sciences Office

A Unified Response to Terrorist & Humanitarian Events

What is ENCOMPASS?

- A computer-based program that assists in **disaster** and **patient information management**
- Consists of several software components that can function as a **unit or independently**
 - Based on the needs of the individual user
- Provides **Incident Commanders** and **First Responders** with a common operational picture of the scene including:
 - Fast-time updates
 - The location and identification of resources and personnel
 - **Situational Awareness:** Forward responders actively collect data **P** automatically fed into a database **P** picture of the scene

ENCOMPASS Provides

DEFENSE SCIENCES OFFICE

- **Planning**: preparation need that all decision makers require whether as standard operating procedures (SOP) or a checklist of requirements.
- **Resource & Casualty Tracking**: ability to know the location of all casualties, responders, equipment and supplies that are necessary in controlling the event
- **Documentation** of multiple events *simultaneously*
- Incident **accountability**

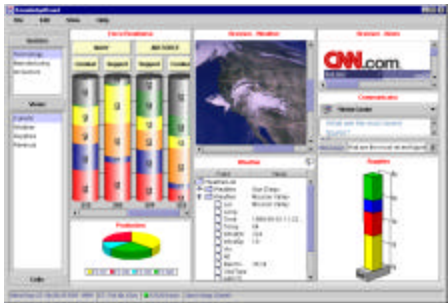

System Highlights

- **Enhanced communication between hospitals and operation centers**
- **Fast-time casualty tracking**
- **Fast-time hospital reroute status**
- **Web-based components**
 - **Application Service Provider (ASP) model**
- **Sharing of treatment protocols**
- **After action reporting capability**

eWebApps
(SOP Management)

ViewPort

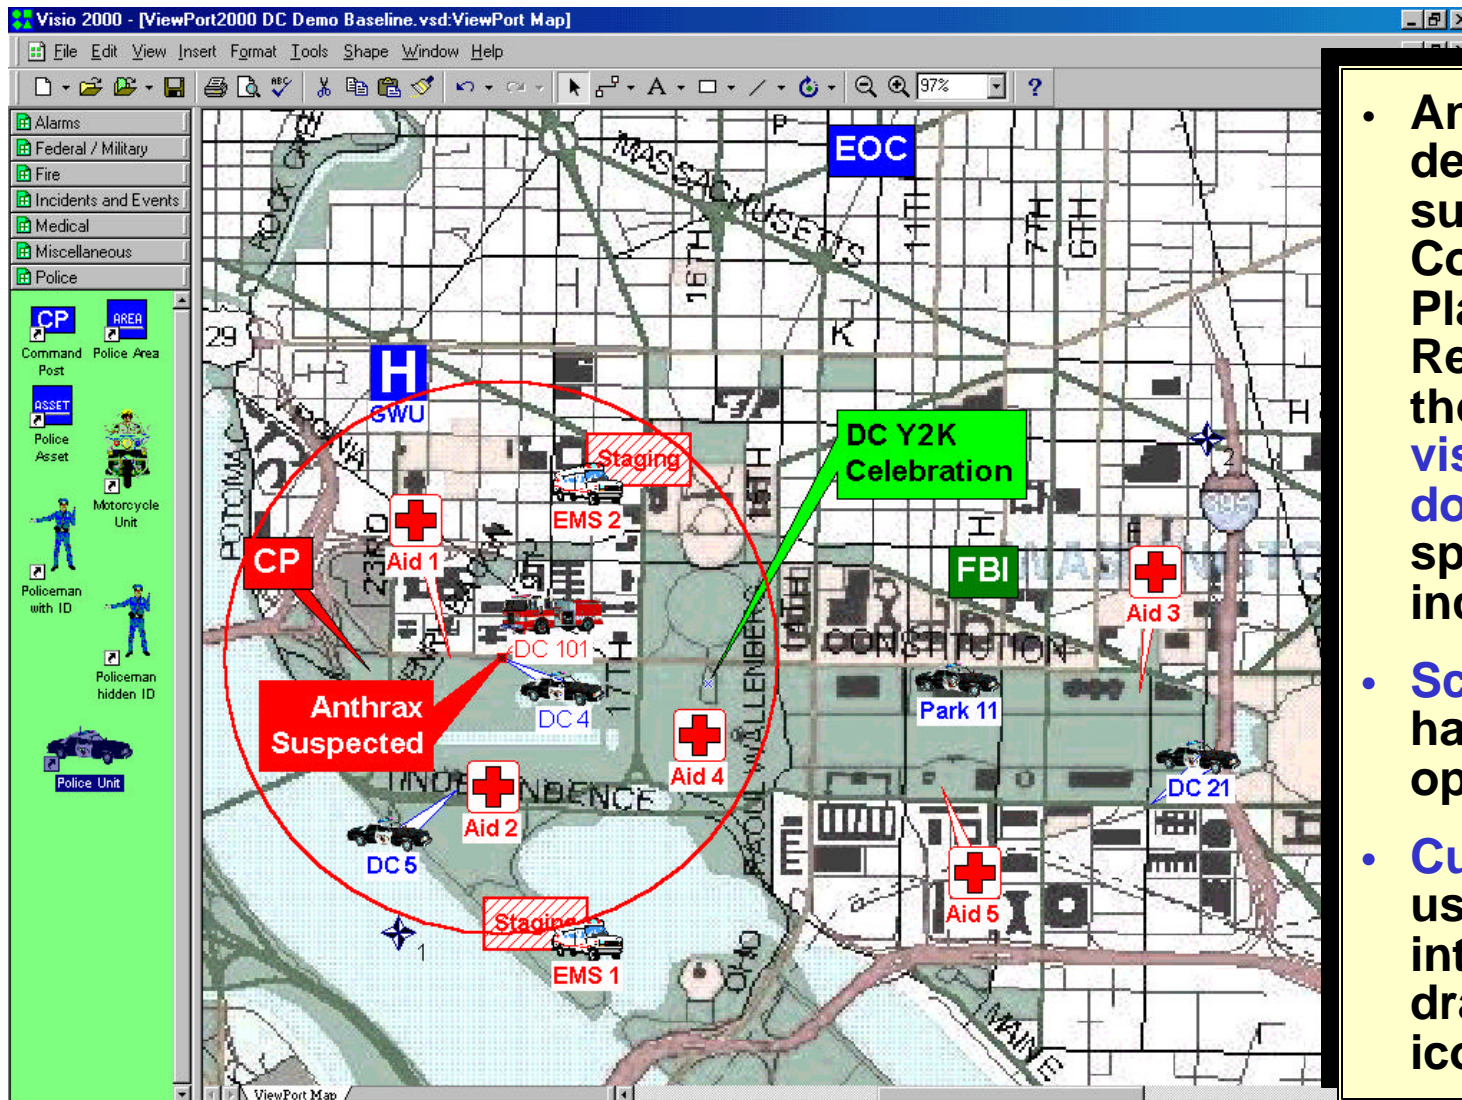

Medical Facility Management

- Single point for information collection & dissemination
- Improved processing speed
- Data sharing across components

ViewPort

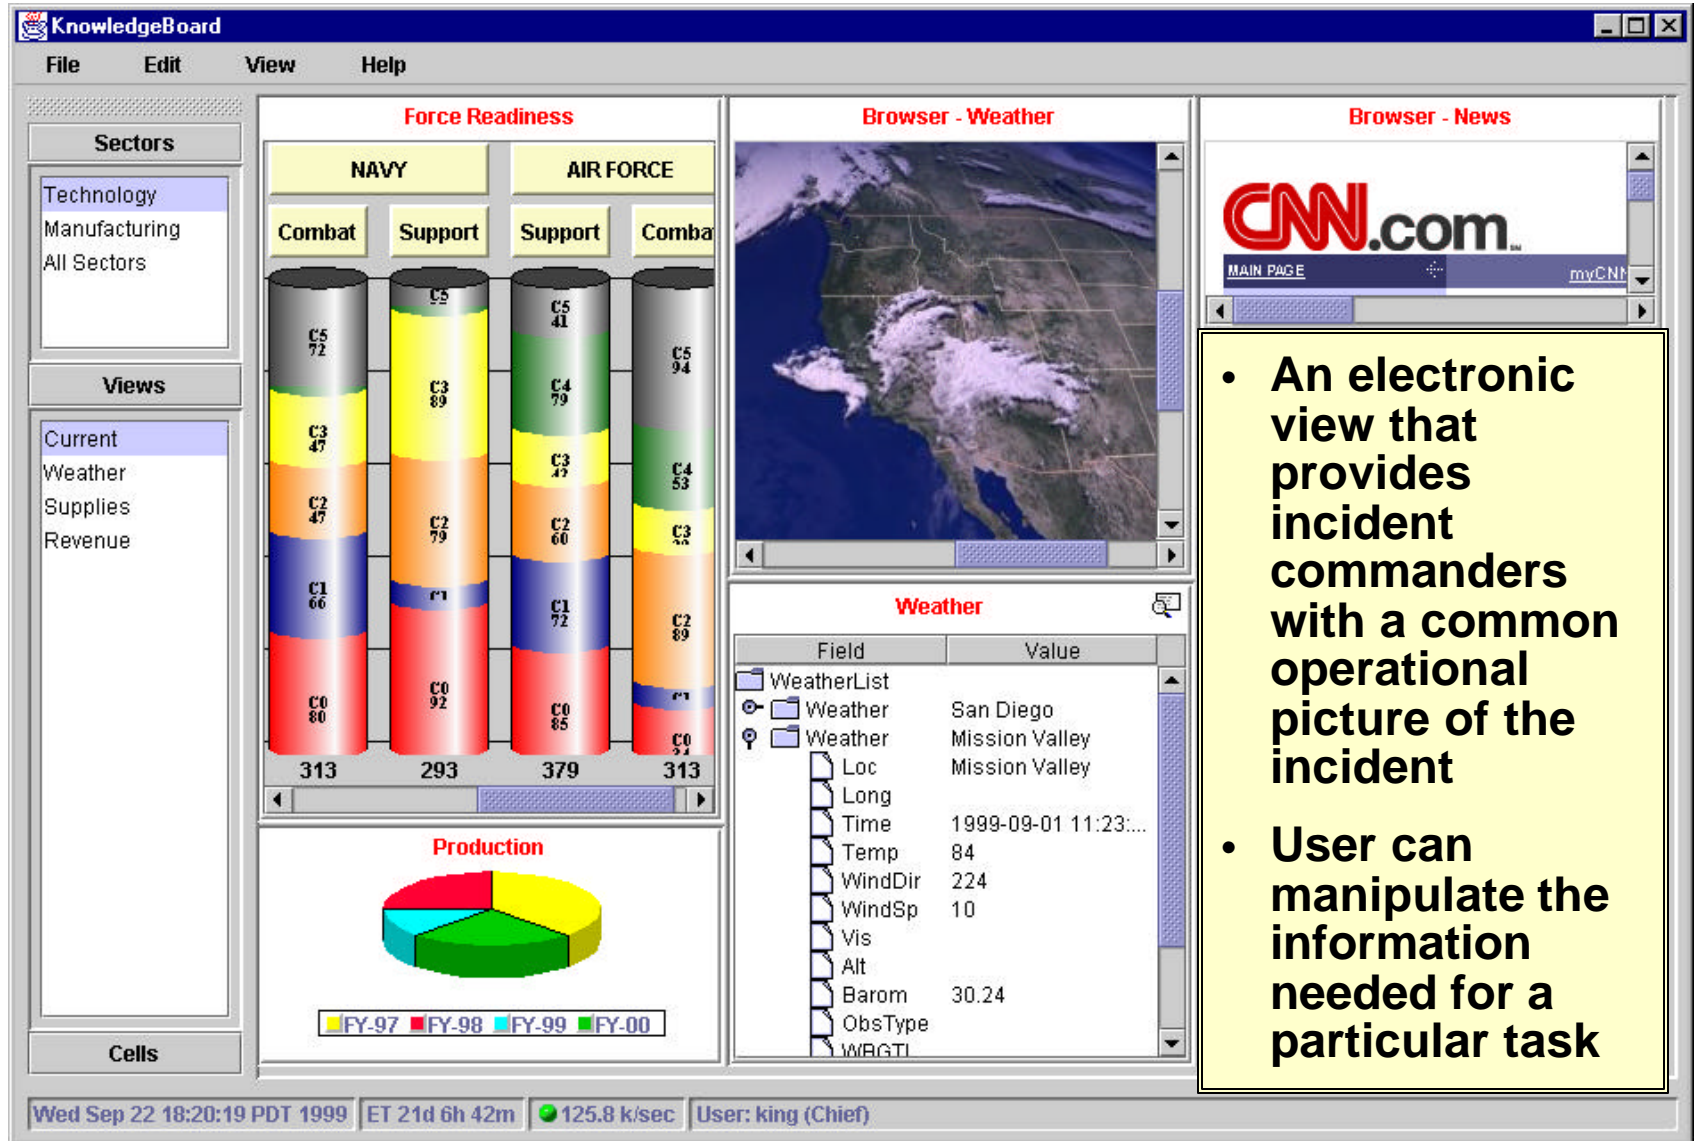

Event Management & Resource Visualization

- An interactive tool developed to support Commanders, Planners, and Responders with the **mangement**, **visualization**, and **documentation** of special events and incident response
- **Scalable**: from handheld to operations center
- **Customizable**: user friendly interface with drag-and-drop icons

WatchBoard

Information Collection, Visualization & Fusion

- An electronic view that provides incident commanders with a common operational picture of the incident
- User can manipulate the information needed for a particular task

- **Incident Management**
- **Casualty Management**
 - **Casualty Tracker (Palm)**
- **Medical Facility Management**
- **Playbook 2000**
- **Emergency Contacts**

Counts

The image shows the CaTT v0.3 Counts screen. It features a table with columns for Casualty, Counts, and Status. The table has rows for Red, Yel, Grn, Blk, and ?. The data shows counts for Down, Wait, and Total. At the bottom, there are status indicators for Comms, Server, Q, and Context.

Casualty	Counts	Status
Red	Yel	Grn
Blk	?	
Down	0	0
Wait	0	0
Total	?	?

Status

The image shows the CaTT v0.3 Status screen. It displays the text 'Free Memory: 20176 bytes'. At the bottom, there are status indicators for Comms, Server, Q, and Context.

Casualty	Counts	Status
Free Memory	20176 bytes	

- Supports wireless modem
- Communications Savvy
 - Sends data if network is up
 - Stores and forwards as needed
